

COVID-19

- Today, 23 patients were tested for COVID-19 at one of Concord Hospital Medical Group's two dedicated COVID-19 screening/testing sites and 16 of those patients were further evaluated by a provider.
- As of March 23, 2020, the Concord Hospital health system has ordered COVID-19 tests for approximately 340 patients. To date, the Hospital has received results for 160 patients, which includes four COVID-19 positive results.
- Of the four positive results, one patient is currently hospitalized at Concord Hospital and three are recovering at home.
- Operation of Concord Hospital Laboratory Services located in the CH Medical Office Building at 1990 Dover Road in Epsom has been suspended. Patients needing lab services may go to the labs located in the Memorial Medical Office Building on the Concord Hospital campus or at CH Medical Offices at Horseshoe Pond in Concord.
- Screening questions at all Concord Hospital locations were updated today per the recommendation of the Hospital's Incident Command Center. *The new question is:*

Do you have a fever or respiratory symptoms, such as a cough or shortness of breath?

- If the patient/visitor answers **NO** to the question, *it is a negative screening and they will be provided access as appropriate.*
- If a visitor answers **YES** to the question, *they are not permitted into the building at this time.*
- If a patient answers **YES** to the question, *they will be directed to an appropriate triage location for further evaluation.*

OUR WISH LIST

every day.

Concord Hospital Trust's Navigating Forward Fund

is now providing medical devices for Concord Hospital Medical Group (CHMG) patients with chronic health conditions, so they may monitor themselves at home. Devices include blood pressure cuffs, glucometers, scales, O2 sat monitors (pulse oximeter) and other items. CHMG patients in need of medical devices should contact their CHMG Nurse Navigator. Anyone wishing to contribute funds to support the Navigating Forward Fund may visit ch-trust.org.
