When It Comes to Your Care – SAFETY FIRST!

Concord Hospital continues to follow Governor Sununu’s guidelines regarding how to restart clinical services previously stopped due to COVID-19. To do this in as safe a manner as possible, the Hospital is assessing each service and ensuring that before it is restarted, we are able to provide staff and patients the safest possible experience. Services that are beginning to restart include ‘time sensitive’ surgeries and all support services needed for such surgeries including pre-surgical testing, office visits and inpatient units. Additional services are also being assessed for restarting as soon as allowed.

Concord Hospital has many protections in place, so please don’t wait to get urgent or emergency care you need.
