Ambulatory Care Center staff
Concord Hospital’s Ambulatory Care Center is staffed with experienced clinicians that are well-educated on the numerous medications that are administered in the department. The staff work in close collaboration with the Hospital Pharmacy and ordering providers to provide you with the best care possible.

The staff are qualified and happy to answer any questions and provide additional information on the medication you are receiving.

Prior to your infusion:
• HYDRATE! In the 24 hours prior to your infusion, drink eight 8-ounce glasses (approx. 2 liters) of non-caffeinated, non-alcoholic, sugar-free beverages such as WATER in addition to your normal intake of fluids.
• Eat a regular meal and take your normal medication UNLESS you have been instructed to hold any medications;
• Bring an updated list of your medications, including any over-the-counter and herbal supplements;
• Wear comfortable clothing.

During your infusion the staff will:
• Place an intravenous catheter or IV if the medication requires it;
• Monitor your vital signs, such as blood pressure and temperature;
• Provide light refreshments on request.

Your entertainment
• Television and magazines are available for your use.
• WiFi is available via a Concord Hospital Guest Network.
• Books, work or other entertainment are encouraged.

Please remember that there are other patients in and around your room and be respectful when accessing and enjoying your chosen entertainment.
